

Understand and manage your energy footprint and costs more easily

Pear.ai: The Smart Utility Expense Management Platform

Understanding your utility bills can be time-consuming, costly and challenging. Constellation provides an innovative approach to help you with utility expense management—the Pear.ai platform.

Pear.ai gives you the power to take control and turn your energy data into one of your most valuable assets. It allows you to proactively manage utility costs, understand trends, and develop strategies to optimize spend and drive sustainability objectives.

The Pear.ai platform and its virtual energy expert Sam can help you generate energy insights—streamline and reduce operating costs with aggregated utility usage and spend data.

Process: Combine bill data across multiple utility providers into a common format and standardized categories for simpler analysis of charges and usage values. No more hunting for paper invoices and searching through piles of data to get answers about your utility expenses.

Easy: Ask direct questions from your data. No need for specialized training or waiting to have customized reports created—provides a genuinely intuitive user experience and sophisticated energy intelligence platform.

Accessible: Create an all-encompassing utility expense profile from your utility bill data across all locations in one place—capture every line item and description to build comprehensive secure online view of your data.

Robust: Powerful and detailed reports and analytics that allow you to see energy data by line item, meter, location and/or cluster of locations—detect errors, highlight areas for improvement, and identify energy efficiency opportunities.

Anomaly Detection: Identify anomalies, delivers actionable insight and model predictive behaviors.

Intelligent: Highly-detailed quality data capture, enable data analysis on a granular level and create any report you require needed.

Sam: Your Virtual Energy Expert

Most organizations struggle to see their true energy footprint, let alone optimize it. With Sam, you can talk to your data and take control.

- **Analysis:** Sam monitors information across your energy portfolio to find anomalies and costly issues to address.
- **Conversations:** With Sam, you get instant access to your data via conversational queries instead of waiting for days for information from account managers or support reps.
- **Proactive Insights:** When Sam finds an issue, it can help you correct it or give you the information you need to follow up.

The screenshot displays the Pear.ai chat interface for Tyrell Corporation. The left sidebar shows navigation options: Home, Portfolio View, Sam (selected), Bills, Locations, Reports, and Payments. The main chat area shows a conversation with Sam, the virtual energy expert. Sam provides a table of locations with the highest electricity costs for March 2018:

| Location | State | Costs |
|--------------------------|-------|-------------|
| Wildlife Safari | OR | \$36,665.17 |
| Wildlife Waystation | CA | \$18,633.17 |
| Happy Hollow | CA | \$14,144.01 |
| Great Cats World | OR | \$10,800.49 |
| Cougar Mountain Zoo | WA | \$4,108.56 |
| The Living Coast | CA | \$1,607.21 |
| Wolf Haven International | WA | \$525.88 |

Below this, Sam provides a bill summary for Palo Alto Util, dated Apr 6 2018, for an amount of \$898.35. The interface includes a search bar, a message input field, and several quick-action buttons like 'What was my bill usage', 'Get bill summary', 'Download bill', and 'When is my bill due'.

Give meaning to your data and identify opportunities for efficiency, demand reduction and potential cost savings. Start proactively taking control of your energy data with the Pear.ai platform—contact your Constellation representative today.

Constellation is a leading competitive retail supplier of power, natural gas and energy products and services for homes and businesses across the continental United States. Constellation's family of retail businesses serves approximately 2 million residential, public sector and business customers, including more than three-fourths of the Fortune 100. Baltimore-based Constellation is the nation's leading competitive energy provider, with more than 32,000 megawatts of owned capacity comprising one of the nation's cleanest and lowest-cost power generation fleets.
